

## MFA Insights - Private Networks Report October 2022

### Welcome to the new MFA Insights newsletter!

As the alliance for private networks, MFA has had an exciting month networking with manufacturing industry partners and associates. We were proud to sponsor and present at the 5G-ACIA Plenary and Industrial 5G Day as well as Hannover Messe USA in Chicago. These events also provided an opportunity for our representatives to meet with current and potential members and key media representatives about the future of MFA.

We plan to continue these meaningful engagements at upcoming events GITEX Global – taking place in Dubai – and the 5G Manufacturing Forum – a virtual event happening in a few weeks. We also hope you will help us encourage interested colleagues to attend our upcoming webinar on simplifying and securing 5G private network deployment and devices.

This month's newsletter features highlights from previous events, details about upcoming activities, access to our Uni5G technology blueprint information, and a deep dive into the Private Wireless Network Report conducted in partnership with Mobile Experts.

As always, we look forward to meeting with you and hope you will continue supporting the Alliance by following us on social media and helping promote our message to your followers.

Sincerely,

**Mazen Chmaytelli**  
MFA President

### GITEX Global

MFA will be making its initial showing at GITEX Global, the world's biggest enterprise solutions showcase, Sunday, October 10<sup>th</sup> through Thursday, October 1<sup>th</sup> at the Dubai World Trade Center, UAE.

Visit our representatives in the GULFOMMS – Zabeel Hall Booth Z2-7 to discuss options for private network resources available to enterprises. Discover how our Uni5G™ technology blueprints, the MFA Network Identifier Program, and MulteFire Technology can simplify 5G private network deployments for enterprises across industry verticals.

### Webinar: Don't Miss It!

Learn how to simplify and secure your 5G private network deployment and devices in this new webinar presented by MFA Certification Authority Ed Pichon. His presentation will cover a critical component of 5G private network deployment – ensuring that devices are able to connect seamlessly and only with authorized devices. As we have shared, MFA was awarded a global PLMN ID from the International Telecommunications Union (ITU). This set of network identifier numbers recognize and authenticate individual networks and MFA is making these available to enterprises and industry verticals through its Network Identifier program.

Webinar attendees will also:

- Gain a deeper understanding of the device ecosystem for private networks
- Learn how MFA-managed identifiers eliminate the danger of identifier collisions as user devices moves into neighboring networks

### 5G Manufacturing Forum

MFA is a proud sponsor of the upcoming “5G Manufacturing Forum” Digital Forum taking place on November 1, 2022. Attendees of this free virtual event will discover how to leverage 5G connectivity for smart manufacturing. MFA Technical Specification Group Chair Asimakis Kokkos will present in the “Designing a future-proofed industrial 5G network” panel session. Stay tuned for time and registration specifics!

## Hello from Hannover Messe USA!

MFA had the unique opportunity to sponsor the HM USA Solutions Theater as well as exhibit at Hannover Messe USA – one of the largest gatherings of industrial manufacturing in North America. MFA representatives were on site to share the benefits of 5G private networks for manufacturing facilities and shed light on the tools MFA has developed for enterprises to leverage and ensure that their private network is able to meet their unique requirements for coverage, reliability, connection density, security, and latency. Presentations were also provided by both MFA President Mazen Chmaytelli and TSG Chair Asimakis Kokkos. The show was a great success, and we are already looking forward to next year's event!

MOBILE EXPERTS

### Mobile Experts Annual Report

Mobile Experts released an annual overview of the Private Wireless Market. The report includes a breakdown of 5G and LTE projections, industry share and more.
