

MFA Insights - Private Networks Report September 2022

Welcome to the new MFA Insights newsletter!

As the alliance for private networks, MFA is pleased to facilitate 3GPP-based private network deployments in any spectrum. Our goal is to develop and share resources that simplify the path to optimized, reliable, and secure private networks in locally licensed, shared, or unlicensed spectrum. Each newsletter, you can expect to receive the latest information about:

- Updates to our various industry tools like the [Uni5G technology blueprints](#) and [Network Identifier Program](#) that can help enterprises deploy their own 5G private network
- Resources for private network deployments and available spectrum options, including a global [tracker of private network deployments](#) and an [interactive spectrum map](#)
- Information about the latest industry events where you can meet with MFA private network experts
- And more!

Continue reading to learn how MFA can help you simplify your path for your own private network deployment. I also invite you to learn more about [MFA membership](#) and join in our efforts to shape the 5G private network landscape.

I look forward to having an opportunity to connect with you in the future.

Sincerely,

Mazen Chmaytelli
MFA President

MFA Shared PLMN-ID – The Ideal Solution for Your Private Network Deployment White Paper

Our latest white paper outlines MFA's Private Network Identifier Package and how it can help industry verticals deploy their own private LTE and 5G networks. Also covered is MFA's PLMN-ID – how it was acquired and the benefits for enterprises.

Paper](#)

Visit MFA at Hannover Messe USA

MFA is excited to be sponsoring, exhibiting, and presenting at Hannover Messe USA, taking place Monday, September 12 through Saturday, September 17 at McCormick Place in Chicago, IL. Visit us in booth #134661 to see MFA technology in action.

Join MFA President Mazen Chmaytelli as he presents on the topic of enabling 5G private networks in any spectrum on Monday, September 12 at 10:30 am CT in the MFA-sponsored Solutions Theater on the exhibition floor. And don't miss MFA Technical Specification Group Chair Asimakis Kokkos as he explains that "Deploying a private network isn't rocket science" and provides practical tools to simplify private network deployment Friday, September 16 at 11:15 am CT, also in the Solutions Theater.

[Schedule a Meeting](#)

Interactive Spectrum Map

MFA has developed a spectrum map tracked according to country/region. Visit our website to learn more about the current 800 globally deployed spectrums and how you can benefit.

Uni5G™

Uni5G Technology Blueprints Free Download

MFA has expanded its scope to facilitate 5G private network deployments based on 3GPP standards. Our free Uni5G technology blueprints identify key features enterprises need to establish private networks and devices.
